

Texas Commission on Environmental Quality

Exemption §106.418 Checklist (Previously Standard Exemption 13)

Non-Heatset Printing Equipment

The following checklist has been developed by the Texas Commission on Environmental Quality (TCEQ) to provide verification that the basic requirements of Exemption §106.418, previously Standard Exemption 13, are met. The following questions are derived from the specific conditions of the exemption. Please read all of the questions and provide specific information applicable to the facility. If all applicable conditions of the specific exemption are not met, the facility will not be allowed to operate under exemption and an application for a construction permit will be required pursuant to §116.110 prior to construction. The TCEQ Non-Heatset Printing Technical Guidance Package provides calculation information and examples.

1. Type of printing equipment involved is _____

_____xerographic copying and duplicating
equipment does not require exemption.
2. The emissions of volatile organic compounds (VOC) and exempt solvents (Non-VOC) are _____ tons
per year from any single press or operation. If greater than 15 TPY, exemption cannot be used.
3. The emissions of VOC and Non-VOC are _____ TPY from all printing equipment and operations
on the plant site. If greater than 25 TPY, exemption cannot be used. If 10 TPY or more, submit a Form PI-7 to
TCEQ.
4. Heated air is used to shorten drying time _____ Yes or _____ No. If yes, the temperature of the heated air is _
____ °F. If greater than 194°F, exemption cannot be used except for screen printing for which temperature restriction
does not apply.
5. Records of usage of materials containing VOC and Non-VOC will be kept for _____ years.
